

Bala Sai Kishore Kadiyam

Technical Product Owner at SIEMENS

Product Owner with 8+ years of experience building and scaling IoT and cloud-based products, working closely with cross-functional teams across multiple product lines. Known for breaking down complex customer and business problems into clear product roadmaps and measurable outcomes. Strong foundation in cloud platforms and software engineering, enabling data-driven decision-making and effective execution. Azure Certified Developer with a growing focus on Generative AI-driven product innovation.

Work Experience

Siemens Technology and Services Pvt Ltd (Nov 2021 - Present)

- *Technical Product Owner (Oct 2024 – Present)*
 - Own product strategy and execution for three industrial IoT products - [SITRANS mobile IQ](#), SITRANS web IQ, and UDM Assets - enabling configuration, commissioning, and monitoring of industrial sensors and transmitters via Bluetooth and web platforms.
 - Led end-to-end device integration lifecycle (ideation → roadmap → release), increasing integration throughput from 2–3 devices/year to 4–6 devices/year by streamlining workflows and cross-team coordination.
 - Successfully delivered integration of 8 devices into the Mobile IQ portfolio and 3 devices into the Web IQ portfolio within the current tenure till date.
 - Drive roadmap planning aligned with organizational North Star metrics, balancing customer needs, platform scalability, and portfolio priorities.
 - Partner closely with global stakeholders across multiple regions and device portfolios to align requirements, manage dependencies, and ensure timely releases.
 - Leading a major application revamp, introducing user-centric UX redesigns and optimized functionality to improve usability, performance, and long-term platform adoption.
- *Senior Software Development Engineer (Nov 2021 – Sept 2024)*
 - Core contributor and technical lead for industrial IoT gateway and cloud platforms, supporting large-scale connected device ecosystems.
 - Served as team lead on [SITRANS hub IQ](#), a cloud platform for connected industrial devices, delivering features such as device onboarding, firmware updates, fleet management, data streaming, and routing.
 - Designed and implemented scalable cloud workflows using AWS services and Kafka, collaborating closely with architects and designers to ensure performance and reliability.
 - Worked extensively with MQTT, HTTPS, and CoAP, strengthening end-to-end IoT communication
 - Developed and owned critical modules for [SITRANS CC220 gateway](#) applications on Linux, including software updates, Bluetooth communication, proxy configuration, and system automation using Node.js and shell scripting.
 - Built Web-BLE applications for POCs and hackathons; multiple solutions progressed toward internal patent review, demonstrating innovation and technical depth.

Robert Bosch Engineering and Business Solutions (Jan 2018 – Oct 2021)

- *Software Engineer (Jul 2018 – Oct 2021)*
 - Backend engineer for multiple IoT and supply-chain platforms, including Smart Seal, [Trac360](#) - Shipment Tracking, Exide Connected Battery, and enterprise logistics systems.
 - Designed and developed scalable backend systems for web portals, mobile applications, RFID handhelds, and GPS devices, supporting high-volume telemetry and operational workflows.
 - Built and maintained cloud-native solutions using Node.js, Python, Azure, and AWS, leveraging services such as IoT Core, Functions/Lambda, Stream Analytics, Cosmos DB, SQS/SNS, and containerized workloads.
 - Led production deployments, process automation initiatives, and proof-of-concepts that improved delivery efficiency and enabled new business opportunities.
- *Intern (Jan 2018 – Jun 2018)*
 - Contributed to an AR-IoT based shipment tracking solution leveraging the Azure cloud services & Thingworx, is showcased at Microsoft Inspire and Microsoft Ready events.

Functional Skills

- **Product Management & Strategy:** Product discovery & problem framing, Road-mapping & prioritization, PRDs & user stories, User research & stakeholder interviews, Portfolio & multi-product ownership, OKRs & success metrics
- **Execution & Leadership:** Cross-functional collaboration, Stakeholder management (global), Agile / Scrum delivery, End-to-end ownership, Backlog grooming & sprint planning
- **Technical & Platform:** Cloud-native product platforms, Mobile Applications, IoT device lifecycle management
- **Tools:** Azure Dev-Ops, Gen AI tools like Chat-GPT, MS Co-pilot

Technical Skills

- **Languages:** JavaScript [Node.js, Express, React], Python, Shell script
- **Cloud:** Microsoft Azure, AWS (Amazon web services)
- **Database:** MongoDB, SQL server, MySQL, Document DB [AWS], Cosmos DB [Azure]
- **Protocols:** MQTT, BLE, HTTP
- **AI, GenAI & Data Platforms:** Gen AI fundamentals, LLMs like Gemini, GPT, Anthropic, Prompt engineering, AI-assisted automation & workflows, Vector databases like chroma, FAISS, RAGs, Agentic AI

Education

- B.Tech in Electronics and Communications Engineering - Honors (2014-2018)
Lovely professional University, Punjab **9.2GPA**
- High Secondary Certificate (2012-2014)
Narayana Junior College, Tenali **97.5%**

Certifications

- Specialization: Generative AI for Product Managers ([CMHSLSYC2BYU](#))
- Specialization: AI & LLM Engineering Mastery - GenAI, RAG Complete Guide ([YIJC5GJNOMYI](#))
- 70-532: Developing Solutions for Microsoft Azure
- AZ-202: Microsoft Azure Developer Certification Transition

Achievements

- Gold Winning Idea – Sensory Saviour System at Internal Siemens Hackathon 2022
 - Microsoft Azure Champions 2020 grand prize winner from hacker earth for standing 5th, 1st & 1st position respectively in a tri-series hackathon. [\[link\]](#)
 - 1st Place in BIAL Hackathon 2022 for creative app ideas for Airport.
 - Gold Idea winner for project-S3 in SAFE hackathon 2022.
 - Showcased POC of IoT Gamification using Reflex Punching Ball in BCW, Germany.
